EXECUTIVE SUMMARY

Results-oriented Backend Software Engineer with hands-on experience designing and delivering scalable, secure, and production-ready systems using C# and ASP.NET Core. Proven track record of building APIs and enterprise applications for government, educational, and organizational environments. Strong foundation in clean architecture, RESTful API design, and collaborative development. Passionate about solving real-world problems through maintainable code and continuous learning.

CORE TECHNICAL SKILLS

Languages: C#

Frameworks: ASP.NET Core, Entity Framework Core, ASP.NET MVC

Architecture & Practices: Clean Architecture, Domain-Driven Design (DDD), RESTful API Design

Databases: PostgreSQL, MySQL

Testing: xUnit

Web Technologies: JavaScript, HTML, CSS

Tools & DevOps: Git, GitHub, Docker, Visual Studio, VS Code

PROFESSIONAL EXPERIENCE

Software Engineer – Sysbeam, Abeokuta

May, 2024 – till date

- Designed and implemented scalable backend APIs using C# and ASP.NET Core to support production enterprise systems.
- Built secure, maintainable modules following clean architecture principles, improving system reliability and long-term maintainability.
- Collaborated with frontend developers, product stakeholders, and QA teams to translate business requirements into technical solutions.
- Optimized backend logic and database interactions, improving application performance and stability in live **environments**.

Key Achievements

- Delivered reusable backend components and internal documentation that improved team development efficiency and onboarding.

- Refactored existing modules and resolved critical defects, reducing production issues and improving code quality.

Major Projects

- **Educational Portal – Federal University of Agriculture, Abeokuta (FUNAAB):**

Developed backend and frontend modules for student registration, course management, and result processing, streamlining academic workflows for students, academic, and non-academic staff.

- **Church Management System – Dayspring Chapel (VLBC):**

Built a full-stack system using ASP.NET Core, HTML, CSS, and JavaScript, featuring role management, appointment scheduling, event coordination, and a dynamic content management system for **real-time updates**.

Software Engineering Intern – Oacsoft Technologies

Jun 2023 – Dec 2023

- Supported backend development using C#, ASP.NET Core, and SQL for scalable application components.
- Assisted in frontend feature implementation and integration with backend services.
- Participated in requirement analysis, feature development, and system optimization within a collaborative engineering team.

Key Contributions

- Improved backend components to enhance security and performance.
- Contributed to code reviews and applied best practices to improve overall code quality.

Projects

- Ogun State Ministry of Environment Website:
- Developed a responsive and user-friendly public-facing website to improve information accessibility and stakeholder communication.
- Environmental Data & Revenue System (EDARMS): Contributed to and later led a three-engineer team building a system for environmental data management, compliance tracking, and revenue collection, improving reporting accuracy and operational decision-making.

ADDITIONAL PROJECTS

- **Hymnal Mobile App (React Native):** Built a cross-platform mobile application featuring categorized hymn listings, real-time search, offline access, and a clean, worship-focused user interface for Android and iOS.
- **Staff & Document Management Service (Full Stack):** Developed a secure platform for managing staff records and organizational documents, including role-based access control and structured document storage.

- **Hospital Management System (Frontend):** Implemented core UI components for patient records, appointment scheduling, and staff operations, ensuring intuitive user flow and usability.
- **AI-Integrated Mental Health Companion (AiComp):** Built an AI-powered mental health support tool that analyzes emotional expressions and behavioral trends to provide personalized insights.

CERTIFICATION

Software Engineering (ALX Africa).

Software Engineering (Code Learners Hub)

EDUCATION

BSc. Biochemistry - Olabisi Onabanjo University, Ago-Iwoye (2008 - 2013)

National Youth Service Corp (NYSC) - Nigeria, 2014

SOFT SKILL

- Problem Solving
 - Team Collaboration
 - Adaptability and Continuous Learning
- Clear Technical Communication
